## **ABBREVIATIONS**

<b>ANN</b>	Artificial Neural Network
<b>AI</b>	Artificial Intelligence
<b>ASR</b>	Automatic Speech Recognition
<b>BERT</b>	Bidirectional Encoder Representation from Transformer
<b>CBET</b>	Competency Based Education and Training
<b>CNN</b>	Convolutional Neural Network
<b>CV</b>	Computer Vision
<b>DL</b>	Deep Learning
<b>DRL</b>	Deep Reinforcement Learning
<b>ELMo</b>	Embedding from Language Models
<b>GAN</b>	Generative Adversarial Network
<b>GPT</b>	Generative Pre-trained Transformer
<b>KG</b>	Knowledge Graph
<b>LSTM</b>	Long Short-Term Memory
<b>ML</b>	Machine Learning
<b>NACTVET</b>	National Council for Technical and Vocational Education and Training
<b>NLG</b>	Natural Language Generation
<b>NLP</b>	Natural Language Processing
<b>NOS</b>	National Occupational Standards
<b>OCR</b>	Optical Character Recognition
<b>OS</b>	Occupational Standards

<b>RL</b>	Reinforcement Learning
<b>RNN</b>	Recurrent Neural Network
<b>TET</b>	Technical Education and Training
<b>TTS</b>	Text-to-Speech
<b>TVET</b>	Technical and Vocational Education and Training

## GLOSSARY OF TERMS

<b>Circumstantial Knowledge:</b>	Detailed knowledge, which allows the decision-making in regard to different circumstances and cross cutting issues.
<b>Competence:</b>	The ability to use knowledge, understanding, practical, and thinking skills to perform effectively to the workplace standards required in employment.
<b>Competency:</b>	A description of the ability one possesses when able to perform a given occupational task effectively and efficiently.
<b>Competency-based Education:</b>	An instructional programme that derives its content from validated tasks and bases assessment on the learner's performance.
<b>Curriculum:</b>	A description or composite of statements about "what is to be learned" by the trainee/student in a particular instructional programme; a product that states the "intended learning outcomes".
<b>Educational/Training Programme:</b>	The complete curriculum and instruction (what and how) that is designed to prepare a person for employment in a job or other particular performance situation.
<b>Occupation:</b>	A specific position requiring the performance of specific tasks – essentially the same tasks are performed by all employees having the same title. (Example: baker)
<b>Occupational Area:</b>	This is a broad grouping of related jobs. (Example: food service)
<b>Occupational Competence:</b>	The application of knowledge and skills that consistently meet the standards required by the work context.
<b>Occupational Standards:</b>	Specific requirements of competences people are expected to demonstrate in a particular occupational area, including knowledge and relevant attitudes. They also act as a performance tool of assessment of the prescribed outcomes.
<b>Occupational/Job Analysis:</b>	A process used to identify the tasks that are important to employees in any given occupation.
<b>Performance Criteria:</b>	Indicate expected end results or outcomes in the form of evaluative statements.
<b>Skills:</b>	The ability to perform occupational tasks with a high degree of proficiency within a given occupation. Skill is conceived of as a composite of three completely interdependent components: cognitive, affective, and psychomotor.

<b>Standards:</b>	A set of statements, which if proved true under working conditions, means that an individual is meeting an expected level and type of performance.
<b>Task Analysis:</b>	The process of analysing each task to determine the steps, circumstantial knowledge, attitudes, performance standards, tools and materials needed, as well as safety concerns required for the employees performing it.
<b>Task:</b>	A work activity that has a definite beginning and ending, is observable or measurable, and consists of two or more definite steps that leads to a product, service, or decision.
<b>Underpinning Knowledge:</b>	Crucial knowledge that an individual must acquire in order to demonstrate competences that are associated in performing a given task.
<b>Verification Process:</b>	The process of having experts review and confirm the importance of the task (competency) statements identified through occupational analysis. Other questions, such as the degree of task learning difficulty are also frequently asked. This process is also sometimes referred to as validation.

## 1.0. INTRODUCTION

Technical Education and Training (TET) is one of the most important education sub-sectors in Tanzania, responsible for developing a skilled workforce to support the country's industrialization economic agenda. Tanzania's *Development Vision 2025* intends to raise the country's economy to a middle-income status. This requires a skilled workforce that is aligned with the needs of the public and private sectors of the economy. The National Council for Technical and Vocational Education and Training of Tanzania has begun the job of drafting Occupational Standards that will eventually be adopted as National Occupational Standards for TET in order to ensure that it meets the needs of the labour market and the country's economic agenda.

National Occupational Standards (NOS) are performance criteria that are matched with labour market demands. Each National Occupational Standard describes functions, performance standards, and knowledge/understanding for one important function or task. They combine skills, knowledge, and attitudes to describe best practice. They are useful tools for establishing job roles, personnel recruiting, supervision, and appraisal, as well as TET standards. They're also helpful for benchmarking and harmonizing qualifications on a national and international level. Standards, in general, provide a solid framework for high-quality TET that is labour market-relevant, current and consistent in delivery across all public and private institutions.

However, it must be noted that, Occupational Standards and Training Standards/Qualifications Standards are different. Occupational Standards are defined in terms of activities performed by a person in a selected occupation (e.g., an electrical engineer designs electrical circuits, performs fault in electrical wiring, etc.) and they are usually defined by employers following procedures agreed upon by all stakeholders. Education and training standards are developed from the activities defined in occupational standards, and they include learning objectives to ensure that the necessary skills and knowledge are developed by a person to enable him or her to function at an agreed level in an occupation. Education and Training standards are used to define curricula in training institutions. It is however critical that there must be a direct link between the Occupational Standards and the training standards to respond to demands of the labour market.

In TET delivery, Tanzania adopted the Competence Based Education and Training (CBET) approach. The CBET approach focuses on providing learners with the skills and knowledge required to meet the Occupational Standards. Occupational Standards are thus the starting point for developing competency-based training (CBET) programmes. TET institutions will be required to benchmark their curricula with relevant Occupational Standards.

Occupational Standards are developed based on a given occupation's current and future demands. As a result, they serve as a means of bridging the gap between the worlds of employment and technical education and training (TET).

The Artificial Intelligence Engineer Occupation has its own set of occupational standards. The document explains how the Occupational Standards were developed, as well as the scope, the occupational profile in the form of DACUM charts, and the Occupational Standards.

## **2.0. OCCUPATIONAL STANDARD DEVELOPMENT PROCESS**

The Occupational Standards development process began with an examination of major documents that guide Tanzanian skill development. The *10-year National Skills Development Strategy (2016-2026)* was one of the documents reviewed, and it outlined six (6) economic sectors that should be prioritized when developing skills development programmes.

These sectors include: Transport and Logistics, Tourism and Hospitality, Agribusiness, Construction, Energy and ICT. NACTE labour market reports were also used in the literature review to determine the skills demand in the Tanzanian labour market as a whole.

After the literature review, a workshop comprised of experts and educators with substantial knowledge and experience in the occupation conducted an occupational analysis utilizing the DACUM approach to produce the occupational profile. The analysis resulted in DACUM Charts, which are attached as **Appendix 1** to this document.

The Occupational Standards were then developed. Experts in Occupational Analysis and the Development of Occupational Standards facilitated the workshop. Interviews, online surveys, and a stakeholder forum were used to validate the Occupational Standards. Engineers, supervisory technicians on the job, and experienced Artificial Intelligence Engineers were key informants in the survey to discover occupational trends. The information was used to gain insight from the workplaces regarding trends and changes in the profession, including how well graduates are prepared for working in the occupation. A total of ..... online surveys were completed by experts from the labour market across the country. Apart from the survey aiding in defining the scope for the occupational analysis, they also served to engage a wide cross-section of experts in the occupation. Apart from this, the stakeholders' forum was attended by ... participants from different parts of the country representing various companies.

## **3.0. THE SCOPE AND OVERVIEW OF THE OCCUPATION STANDARDS FOR ARTIFICIAL INTELLIGENCE ENGINEERS**

The standards cover a broad range of duties and tasks that can be performed by an Artificial Intelligence Engineer. However, the occupational standards are not meant to replace individual job

descriptions. Instead, they are to be used for guidance in defining skill levels and knowledge for the technician in specific settings or positions. The Artificial Intelligence Engineer may perform tasks in a number of key areas of the occupational standards, but not necessarily in all areas. For example, in large operations, other individuals may be employed or designated to perform specific tasks.

Artificial Intelligence Engineers not only master the process of selecting, implementing, optimizing and applying basic AI models, but also work on the development and application of AI platforms, and the development, management technology consulting and evaluation of AI-related projects. They must always keep abreast of the latest technological advances, as a full understanding of these advances is crucial for the continued development of their business. Generally, the Artificial Intelligence Engineer performs the following responsibilities:

- a) Selection of AI algorithms
- b) Implementation of AI algorithms
- c) Optimization of AI algorithms
- d) Application of AI algorithms
- e) Management and operation of AI platforms
- f) Development and analysis of natural language and speech processing requirements analysis report
- g) Deployment of the technical architecture and business system of natural language and speech processing projects
- h) Development and management of natural language and speech processing projects
- i) Development and analysis of computer vision project requirements analysis reports
- j) Training, inference, and deployment of basic algorithm models for computer vision
- k) Engineering of common hardware environments and tool chains using computer vision algorithms
- l) Development and management of computer vision basics projects
- m) Development and analysis of requirements analysis reports for AI application integration
- n) Development of data analysis and processing methods
- o) Development and management of AI application integration models
- p) Completion of the integration test of AI related projects (products)
- q) Provision of technical consulting and evaluation services for AI projects

The Occupational Standards have been clustered into NTA qualification levels, i.e. NTA 7 and 8.

#### **4.0. VALIDITY PERIOD**

Due to the rapid development of technology, the validity period of occupational standards is 3-5 years. The review will proceed in the same manner as the one before it, with new occupational standards being developed based on current trends of the labour market.

#### **5.0. OCCUPATIONAL STANDARDS**

## 5.1 OCCUPATIONAL STANDARDS FOR ARTIFICIAL INTELLIGENCE ENGINEER - NTA 7

<b>OCCUPATION</b>	ARTIFICIAL INTELLIGENCE ENGINEER	<b>OCCUPATION CODE</b>	
<b>DUTY TITLE</b>	SELECTION AND SIMPLE APPLICATION OF BASIC AI MODELS	<b>DUTY NO.</b>	701
<b>TASK TITLE</b>	CONSTRUCTION OF AN AI MODEL DEVELOPMENT ENVIRONMENT	<b>TASK NO.</b>	7011
<b>PERFORMANCE CRITERIA</b>	The person performing this task must be able to construct an AI development environment in accordance with industry standards and national norms.		
<b>RANGE STATEMENT</b>	<p>The task can be performed independently or as a team in the office place under the supervision of artificial intelligence engineers.</p> <p>The tools and equipment to be used include:</p> <ol style="list-style-type: none"> <li>1. System documents;</li> <li>2. Computers;</li> <li>3. AI model related software tools.</li> </ol>		
<b>EVIDENCE REQUIREMENT</b>			
<b>PRACTICAL PERFORMANCE</b>		<b>UNDERPINNING KNOWLEDGE</b>	
<p>The person performing this task must be able to do the following:</p> <ol style="list-style-type: none"> <li>1. Select and obtain development environment related software;</li> <li>2. Install and configure software related to the AI model development environment;</li> <li>3. Validate the correctness of the construction of the AI model development environment;</li> <li>4. Analyse and solve installation and configuration problems;</li> <li>5. Observe health and safety precautions;</li> <li>6. Keep the workplace clean;</li> <li>7. Store the tools.</li> </ol>		<p><b>Detailed knowledge about:</b></p> <p><b>1.0 Methods</b></p> <p>The person performing this task must be able to explain how to:</p> <ol style="list-style-type: none"> <li>1.1 Install an AI model development environment;</li> <li>1.2 Configure an AI model development environment;</li> <li>1.3 Upgrade the AI model development environment;</li> <li>1.4 Uninstall the AI model development environment.</li> </ol> <p><b>2.0 Principles</b></p> <p>The person performing this task must be able to explain the following principles:</p> <ol style="list-style-type: none"> <li>2.1 Operation of AI models;</li> <li>2.2 Requirements of the AI model environment.</li> </ol> <p><b>3.0 Theories</b></p> <p>The person performing this task must be able to explain the following:</p> <ol style="list-style-type: none"> <li>3.1 AI development environment installation methods;</li> <li>3.2 AI development environment configuration requirements;</li> <li>3.3 AI development environment upgrade procedures;</li> <li>3.4 AI development environment uninstallation process.</li> </ol> <p><b>4.0 Essential Skills</b></p>	

	<ul style="list-style-type: none"> <li>4.1 Analysis skills;</li> <li>4.2 Critical thinking skills;</li> <li>4.3 Problem-solving skills;</li> <li>4.4 Communication skills;</li> <li>4.5 Teamwork skills;</li> <li>4.6 Leadership skills;</li> <li>4.7 Project management skills;</li> <li>4.8 Time management skills.</li> </ul>
<b>DESCRIPTION OF THE END PRODUCT / SERVICE</b>	The AI model development environment is constructed in accordance with industry standards and national norms.
<b>CIRCUMSTANTIAL KNOWLEDGE</b>	<p><b>Detailed knowledge about:</b></p> <ul style="list-style-type: none"> <li>1. Occupational health and safety;</li> <li>2. Computer security;</li> <li>3. Network security.</li> </ul>

<b>OCCUPATION</b>	ARTIFICIAL INTELLIGENCE ENGINEER	<b>OCCUPATION CODE</b>	
<b>DUTY TITLE</b>	SELECTION AND SIMPLE APPLICATION OF BASIC AI MODELS	<b>DUTY NO.</b>	701
<b>TASK TITLE</b>	RUNNING AI BASIC NEURAL NETWORK MODELS	<b>TASK NO.</b>	7012
<b>PERFORMANCE CRITERIA</b>	The person performing this task must be able to run the selected neural network model in accordance with industry standards and national norms.		
<b>RANGE STATEMENT</b>	<p>The task can be performed independently or as a team in the office place under the supervision of artificial intelligence engineers.</p> <p>The tools and equipment to be used include:</p> <ol style="list-style-type: none"> <li>1. System documents;</li> <li>2. Computers;</li> <li>3. AI model related software tools.</li> </ol>		
<b>EVIDENCE REQUIREMENT</b>			
<b>PRACTICAL PERFORMANCE</b>		<b>UNDERPINNING KNOWLEDGE</b>	
<p>The person performing this task must be able to do the following:</p> <ol style="list-style-type: none"> <li>1. Select basic AI models;</li> <li>2. Obtain AI model software;</li> <li>3. Import AI neural network models;</li> <li>4. Configure AI neural network models;</li> <li>5. Run AI neural network models;</li> <li>6. Analyse and solve problems in the running model;</li> <li>7. Observe health and safety precautions;</li> <li>8. Keep the workplace clean;</li> <li>9. Store the tools.</li> </ol>		<p><b>Detailed knowledge about:</b></p> <p><b>1.0 Methods</b></p> <p>The person performing this task must be able to explain how to:</p> <ol style="list-style-type: none"> <li>1.1 Build AI neural network models;</li> <li>1.2 Run AI neural network models.</li> </ol> <p><b>2.0 Principles</b></p> <p>The person performing this task must be able to explain the following principles:</p> <ol style="list-style-type: none"> <li>2.1 AI neural network models;</li> <li>2.2 AI neural network model operation;</li> <li>2.3 AI neural network model configuration.</li> </ol> <p><b>3.0 Theories</b></p> <p>The person performing this task must be able to explain the following:</p> <ol style="list-style-type: none"> <li>3.1 AI neural network model standards;</li> <li>3.2 AI neural network model configuration procedures;</li> <li>3.3 AI neural network model running procedures.</li> </ol> <p><b>4.0 Essential Skills</b></p> <ol style="list-style-type: none"> <li>4.1 Problem analysis and solving skills;</li> <li>4.2 Critical thinking skills;</li> <li>4.3 Learning skills;</li> <li>4.4 Communication skills;</li> <li>4.5 Teamwork skills;</li> <li>4.6 Leadership skills;</li> </ol>	

	<p>4.7 Project management skills;</p> <p>4.8 Time management skills.</p>
<b>DESCRIPTION OF THE END PRODUCT / SERVICE</b>	AI basic neural network models are imported, configured and run in accordance with industry standards and national norms.
<b>CIRCUMSTANTIAL KNOWLEDGE</b>	<p><b>Detailed knowledge about:</b></p> <ol style="list-style-type: none"> <li>1. Occupational health and safety;</li> <li>2. Computer security;</li> <li>3. Network security.</li> </ol>

<b>OCCUPATION</b>	ARTIFICIAL INTELLIGENCE ENGINEER	<b>OCCUPATION CODE</b>	
<b>DUTY TITLE</b>	SELECTION AND SIMPLE APPLICATION OF BASIC AI MODELS	<b>DUTY NO.</b>	701
<b>TASK TITLE</b>	SOLVING ACTUAL BUSINESS PROBLEMS USING BASIC AI MODELS	<b>TASK NO.</b>	7013
<b>PERFORMANCE CRITERIA</b>	The person performing this task must be able to solve actual business using basic AI models in accordance with industry standards and national norms.		
<b>RANGE STATEMENT</b>	<p>The task can be performed independently or as a team in the office place under the supervision of Artificial Intelligence Engineers.</p> <p>The tools and equipment to be used include:</p> <ol style="list-style-type: none"> <li>1. System documents;</li> <li>2. Computers;</li> <li>3. AI-related software tools;</li> <li>4. Artificial intelligence engineer toolkit.</li> </ol>		
<b>EVIDENCE REQUIREMENT</b>			
<b>PRACTICAL PERFORMANCE</b>		<b>UNDERPINNING KNOWLEDGE</b>	
<p>The person performing this task must be able to do the following:</p> <ol style="list-style-type: none"> <li>1. Analyse the characteristics of actual business;</li> <li>2. Make comparative analysis of different deep learning or mainstream machine learning model algorithms;</li> <li>3. Select suitable model algorithms for actual business;</li> <li>4. Import AI models into the AI development environment;</li> <li>5. Decompose the actual business into data acceptable to the model;</li> <li>6. Import actual business data into the model;</li> <li>7. Run AI models;</li> <li>8. Analyse the running results;</li> <li>9. Observe health and safety precautions;</li> <li>10. Keep the workplace clean;</li> <li>11. Store the tools.</li> </ol>		<p><b>Detailed knowledge about:</b></p> <p><b>1.0 Methods</b></p> <p>The person performing this task must be able to explain how to:</p> <ol style="list-style-type: none"> <li>1.1 Select the appropriate AI machine learning model algorithm;</li> <li>1.2 Apply deep learning or mainstream machine learning algorithm principles to write scripts to run them.</li> </ol> <p><b>2.0 Principles</b></p> <p>The person performing this task must be able to explain the following principles:</p> <ol style="list-style-type: none"> <li>2.1 Application of AI machine learning algorithms;</li> <li>2.2 Application of AI deep learning algorithms.</li> </ol> <p><b>3.0 Theories</b></p> <p>The person performing this task must be able to explain the following:</p> <ol style="list-style-type: none"> <li>3.1 Machine learning algorithm requirements;</li> <li>3.2 Deep learning algorithm requirements;</li> <li>3.3 Operation of script languages;</li> <li>3.4 Application of scenario strategies.</li> </ol> <p><b>4.0 Essential Skills</b></p> <ol style="list-style-type: none"> <li>4.1 Problem analysis and solving skills;</li> <li>4.2 Critical thinking skills;</li> <li>4.3 Complex task control capabilities;</li> </ol>	

	<p>4.4 Communication skills;</p> <p>4.5 Teamwork skills;</p> <p>4.6 Leadership skills;</p> <p>4.7 Project management skills;</p> <p>4.8 Time management skills.</p> <p><b>5.0 Math Skills</b></p> <p>5.1 Statistics;</p> <p>5.2 Linear algebra;</p> <p>5.3 Advanced mathematics.</p>
<b>DESCRIPTION OF THE END PRODUCT / SERVICE</b>	Basic AI models are used to solve actual business in accordance with industry standards and national norms.
<b>CIRCUMSTANTIAL KNOWLEDGE</b>	<p><b>Detailed knowledge about:</b></p> <ol style="list-style-type: none"> <li>1. Occupational health and safety;</li> <li>2. Computer security;</li> <li>3. Network security.</li> </ol>

<b>OCCUPATION</b>	ARTIFICIAL INTELLIGENCE ENGINEER	<b>OCCUPATION CODE</b>	
<b>DUTY TITLE</b>	IMPLEMENTATION AND APPLICATION OF BASIC DEEP LEARNING ALGORITHMS	<b>DUTY NO.</b>	702
<b>TASK TITLE</b>	ANALYSIS OF DEEP LEARNING FRAMEWORK MODELS	<b>TASK NO.</b>	7021
<b>PERFORMANCE CRITERIA</b>	The person performing this task must be able to analyse basic deep learning framework training models in accordance with industry standards and national information and communications technology guidelines.		
<b>RANGE STATEMENT</b>	<p>The task can be performed in the office place under the supervision of artificial intelligence engineers.</p> <p>The tools and equipment to be used include:</p> <ol style="list-style-type: none"> <li>1. System documents;</li> <li>2. Computers;</li> <li>3. AI software tools (PyCharm, etc.);</li> <li>4. Artificial intelligence engineer toolkit.</li> </ol>		
<b>EVIDENCE REQUIREMENT</b>			
<b>PRACTICAL PERFORMANCE</b>		<b>UNDERPINNING KNOWLEDGE</b>	
<p>The person performing this task must be able to do the following:</p> <ol style="list-style-type: none"> <li>1. Select mainstream deep learning framework models (PyTorch, Tensorflow, paddlepaddle, etc.);</li> <li>2. Analyse the workflow of deep learning frameworks;</li> <li>3. Analyse typical use cases of deep learning framework models;</li> <li>4. Observe health and safety precautions;</li> <li>5. Keep the workplace clean;</li> <li>6. Store the tools.</li> </ol>		<p><b>Detailed knowledge about:</b></p> <p><b>1.0 Methods</b></p> <p>The person performing this task must be able to explain how to:</p> <ol style="list-style-type: none"> <li>1.1 Distinguish mainstream deep learning frameworks;</li> <li>1.2 Compare the applicable scope, advantages and disadvantages of each framework;</li> <li>1.3 Analyse the functions of mainstream deep learning frameworks.</li> </ol> <p><b>2.0 Principles</b></p> <p>The person performing this task must be able to explain the following principles:</p> <ol style="list-style-type: none"> <li>2.1 AI deep learning frameworks;</li> <li>2.2 AI machine learning frameworks.</li> </ol> <p><b>3.0 Theories</b></p> <p>The person performing this task must be able to explain the following:</p> <ol style="list-style-type: none"> <li>3.1 Classification, regression, and clustering of machine learning framework models;</li> <li>3.2 Methods of data dimensionality reduction, selection and data pre-processing of machine learning framework models;</li> <li>3.3 Tensor operations, matrix correlation operations, complex operations, and reduction calculation methods for deep learning framework models;</li> </ol>	

	<p>3.4 Segmentation, sequence comparison, and index extraction of deep learning framework models.</p> <p><b>4.0 Essential Skills</b></p> <p>4.1 Problem-solving skills;</p> <p>4.2 Critical thinking skills;</p> <p>4.3 Communication skills;</p> <p>4.4 Report writing skills;</p> <p>4.5 Interpersonal skills;</p> <p>4.6 Teamwork skills;</p> <p>4.7 Time management skills.</p> <p><b>5.0 Math Skills</b></p> <p>5.1 Knowledge of statistics;</p> <p>5.2 Knowledge of linear algebra matrix;</p> <p>5.3 Knowledge of advanced mathematics functions.</p>
<b>DESCRIPTION OF THE END PRODUCT / SERVICE</b>	Deep learning framework models are analysed in accordance with industry standards and national information and communications technology guidelines.
<b>CIRCUMSTANTIAL KNOWLEDGE</b>	<p><b>Detailed knowledge about:</b></p> <ol style="list-style-type: none"> <li>1. Occupational health and safety;</li> <li>2. Computer security;</li> <li>3. Network security.</li> </ol>

<b>OCCUPATION</b>	ARTIFICIAL INTELLIGENCE ENGINEER	<b>OCCUPATION CODE</b>	
<b>DUTY TITLE</b>	IMPLEMENTATION AND APPLICATION OF BASIC DEEP LEARNING ALGORITHMS	<b>DUTY NO.</b>	702
<b>TASK TITLE</b>	INSTALLATION, UPGRADE, AND UNINSTALLATION OF DEEP LEARNING FRAMEWORKS	<b>TASK NO.</b>	7022
<b>PERFORMANCE CRITERIA</b>	The person performing this task must be able to install, upgrade, and uninstall deep learning frameworks in accordance with industry standards and national information and communications technology guidelines.		
<b>RANGE STATEMENT</b>	<p>The task can be performed in the office place under the supervision of artificial intelligence engineers.</p> <p>The tools and equipment to be used include:</p> <ol style="list-style-type: none"> <li>1. System documents;</li> <li>2. Computers;</li> <li>3. AI software tools (PyCharm, etc.);</li> <li>4. Artificial intelligence engineer toolkit.</li> </ol>		
<b>EVIDENCE REQUIREMENT</b>			
<b>PRACTICAL PERFORMANCE</b>		<b>UNDERPINNING KNOWLEDGE</b>	
<p>The person performing this task must be able to do the following:</p> <ol style="list-style-type: none"> <li>1. Install deep learning frameworks (PyTorch, Tensorflow, paddlepaddle, etc.);</li> <li>2. Perform data backup;</li> <li>3. Upgrade deep learning frameworks;</li> <li>4. Back up and restore deep learning frameworks;</li> <li>5. Uninstall deep learning frameworks;</li> <li>6. Test the AI deep learning framework that has been installed, upgraded, or uninstalled;</li> <li>7. Observe health and safety precautions;</li> <li>8. Keep the workplace clean;</li> <li>9. Store the tools.</li> </ol>		<p><b>Detailed knowledge about:</b></p> <p><b>1.0 Methods</b></p> <p>The person performing this task must be able to explain how to:</p> <ol style="list-style-type: none"> <li>1.1 Perform data backup;</li> <li>1.2 Install deep learning frameworks;</li> <li>1.3 Upgrade deep learning frameworks;</li> <li>1.4 Uninstall deep learning frameworks;</li> <li>1.5 Test deep learning frameworks.</li> </ol> <p><b>2.0 Principles</b></p> <p>The person performing this task must be able to explain the following principles:</p> <ol style="list-style-type: none"> <li>2.1 AI data backup;</li> <li>2.2 AI deep learning frameworks.</li> </ol> <p><b>3.0 Theories</b></p> <p>The person performing this task must be able to explain the following:</p> <ol style="list-style-type: none"> <li>3.1 Deep learning framework installation procedures;</li> <li>3.2 Deep learning framework software library;</li> <li>3.3 Script languages for operating frameworks;</li> <li>3.4 Data backup methods.</li> </ol> <p><b>4.0 Essential Skills</b></p>	

	<ul style="list-style-type: none"> <li>4.1 Problem-solving skills;</li> <li>4.2 Critical thinking skills;</li> <li>4.3 Data backup skills;</li> <li>4.4 Communication skills;</li> <li>4.5 Report writing skills;</li> <li>4.6 Interpersonal skills;</li> <li>4.7 Teamwork skills;</li> <li>4.8 Time management skills.</li> </ul>
<b>DESCRIPTION OF THE END PRODUCT / SERVICE</b>	The knowledge related to the installation, upgrade, and uninstallation of at least one deep learning framework is acquired in accordance with industry standards and national information and communications technology guidelines.
<b>CIRCUMSTANTIAL KNOWLEDGE</b>	<p><b>Detailed knowledge about:</b></p> <ul style="list-style-type: none"> <li>1. Occupational health and safety;</li> <li>2. Computer security;</li> <li>3. Network security.</li> </ul>

<b>OCCUPATION</b>	ARTIFICIAL INTELLIGENCE ENGINEER	<b>OCCUPATION CODE</b>	
<b>DUTY TITLE</b>	IMPLEMENTATION AND APPLICATION OF BASIC DEEP LEARNING ALGORITHMS	<b>DUTY NO.</b>	702
<b>TASK TITLE</b>	TRAINING AND USE OF DEEP LEARNING FRAMEWORK MODELS	<b>TASK NO.</b>	7023
<b>PERFORMANCE CRITERIA</b>	The person performing this task must be able to train and use deep learning framework models in accordance with industry standards and national information and communications technology guidelines.		
<b>RANGE STATEMENT</b>	<p>The task can be performed in the office place under the supervision of artificial intelligence engineers.</p> <p>The tools and equipment to be used include:</p> <ol style="list-style-type: none"> <li>1. System documents;</li> <li>2. Computers;</li> <li>3. AI software tools (PyCharm, etc.);</li> <li>4. Artificial intelligence engineer toolkit.</li> </ol>		
<b>EVIDENCE REQUIREMENT</b>			
<b>PRACTICAL PERFORMANCE</b>		<b>UNDERPINNING KNOWLEDGE</b>	
<p>The person performing this task must be able to do the following:</p> <ol style="list-style-type: none"> <li>1. Log in to the local computer;</li> <li>2. Deploy and run deep learning framework models (PyTorch, Tensorflow, Paddlepaddle, etc.) on a local computer;</li> <li>3. Use deep learning framework models;</li> <li>4. Test the trained deep learning model;</li> <li>5. Observe health and safety precautions;</li> <li>6. Keep the workplace clean;</li> <li>7. Store the tools.</li> </ol>		<p><b>Detailed knowledge about:</b></p> <p><b>1.0 Methods</b></p> <p>The person performing this task must be able to explain how to:</p> <ol style="list-style-type: none"> <li>1.1 Operate deep learning frameworks based on script languages;</li> <li>1.2 Train deep learning framework models;</li> <li>1.3 Test the trained deep learning framework model.</li> </ol> <p><b>2.0 Principles</b></p> <p>The person performing this task must be able to explain the following principles:</p> <ol style="list-style-type: none"> <li>2.1 Deep learning framework models;</li> <li>2.2 Use of deep learning framework models.</li> </ol> <p><b>3.0 Theories</b></p> <p>The person performing this task must be able to explain the following:</p> <ol style="list-style-type: none"> <li>3.1 Deep learning framework test procedures;</li> <li>3.2 Deep learning framework software library;</li> <li>3.3 Script languages for operating frameworks;</li> <li>3.4 Data backup methods.</li> </ol> <p><b>4.0 Essential Skills</b></p> <ol style="list-style-type: none"> <li>4.1 Problem-solving skills;</li> <li>4.2 Critical thinking skills;</li> </ol>

	<p>4.2 Platform planning capabilities;</p> <p>4.3 Solution development skills;</p> <p>4.4 Project leadership skills;</p> <p>4.5 Project consulting capabilities.</p>
<b>DESCRIPTION OF THE END PRODUCT / SERVICE</b>	<p>Technical consulting services for AI platform projects are recommended to be implemented in accordance with industry standards and national information and communications technology governance guidelines.</p>
<b>CIRCUMSTANTIAL KNOWLEDGE</b>	<p><b>Detailed knowledge about:</b></p> <ol style="list-style-type: none"> <li>1. Occupational health and safety;</li> <li>2. Computer security;</li> <li>3. Network security.</li> </ol>

<b>OCCUPATION</b>	ARTIFICIAL INTELLIGENCE ENGINEER	<b>OCCUPATION CODE</b>	
<b>DUTY TITLE</b>	BASIC TECHNICAL CONSULTING FOR AI PROJECTS	<b>DUTY NO.</b>	707
<b>TASK TITLE</b>	PROVISION OF SIMPLE TECHNICAL CONSULTING SERVICES FOR NATURAL LANGUAGE PROCESSING AND SPEECH RECOGNITION	<b>TASK NO.</b>	7072
<b>PERFORMANCE CRITERIA</b>	The person performing this task must be able to recommend the implementation of simple technical consulting services for natural language processing and speech recognition in accordance with industry standards and national information and communications technology governance guidelines.		
<b>RANGE STATEMENT</b>	<p>The task can be performed in the office place under the supervision of artificial intelligence engineers.</p> <p>The tools and equipment to be used include:</p> <ol style="list-style-type: none"> <li>1. System documents;</li> <li>2. Computers;</li> <li>3. AI-related software tools.</li> </ol>		
<b>EVIDENCE REQUIREMENT</b>			
<b>PRACTICAL PERFORMANCE</b>		<b>UNDERPINNING KNOWLEDGE</b>	
<p>The person performing this task must be able to do the following:</p> <ol style="list-style-type: none"> <li>1. Complete technical consulting for natural language processing, speech recognition, speech synthesis and semantic understanding projects;</li> <li>2. Develop and design the technical architecture and scheme of natural language and speech processing projects;</li> <li>3. Complete the preparation of project proposals, feasibility study reports, and implementation plans;</li> <li>4. Observe health and safety precautions;</li> <li>5. Keep the workplace clean;</li> <li>6. Store the tools.</li> </ol>		<p><b>Detailed knowledge about:</b></p> <p><b>1.0 Methods</b></p> <p>The person performing this task must be able to explain how to:</p> <ol style="list-style-type: none"> <li>1.1 Implement technical consulting services for natural language and speech processing projects;</li> <li>1.2 Complete the preparation of consulting documents related to natural language and speech processing projects.</li> </ol> <p><b>2.0 Principles</b></p> <p>The person performing this task must be able to explain the following principles:</p> <ol style="list-style-type: none"> <li>2.1 Natural language processing;</li> <li>2.2 Speech recognition;</li> <li>2.3 Speech synthesis;</li> <li>2.4 Semantic understanding;</li> <li>2.2 Natural language and speech processing planning.</li> </ol> <p><b>3.0 Theories</b></p> <p>The person performing this task must be able to explain the following:</p> <ol style="list-style-type: none"> <li>3.1 Natural language processing methods;</li> <li>3.2 Speech recognition methods;</li> </ol>	

	<p>3.3 Speech synthesis methods;</p> <p>3.4 Semantic understanding methods.</p> <p><b>4.0 Essential Skills</b></p> <p>4.1 Communication, reporting and document writing skills;</p> <p>4.2 Problem analysis and solving skills;</p> <p>4.3 Solution development skills;</p> <p>4.4 Project leadership skills;</p> <p>4.5 Project consulting capabilities.</p>
<b>DESCRIPTION OF THE END PRODUCT / SERVICE</b>	Simple technical consulting services for natural language processing and speech recognition are recommended to be implemented in accordance with industry standards and national information and communications technology governance guidelines.
<b>CIRCUMSTANTIAL KNOWLEDGE</b>	<p><b>Detailed knowledge about:</b></p> <ol style="list-style-type: none"> <li>1. Occupational health and safety;</li> <li>2. Computer security;</li> <li>3. Network security.</li> </ol>

<b>OCCUPATION</b>	ARTIFICIAL INTELLIGENCE ENGINEER	<b>OCCUPATION CODE</b>	
<b>DUTY TITLE</b>	BASIC TECHNICAL CONSULTING FOR AI PROJECTS	<b>DUTY NO.</b>	707
<b>TASK TITLE</b>	PROVISION OF SIMPLE TECHNICAL CONSULTING SERVICES FOR COMPUTER VISION PROJECTS	<b>TASK NO.</b>	7073
<b>PERFORMANCE CRITERIA</b>	The person performing this task must be able to recommend the implementation of simple technical consulting services for computer vision projects in accordance with industry standards and national information and communications technology governance guidelines.		
<b>RANGE STATEMENT</b>	<p>The task can be performed in the office place under the supervision of artificial intelligence engineers.</p> <p>The tools and equipment to be used include:</p> <ol style="list-style-type: none"> <li>1. System documents;</li> <li>2. Computers;</li> <li>3. AI-related software tools.</li> </ol>		
<b>EVIDENCE REQUIREMENT</b>			
<b>PRACTICAL PERFORMANCE</b>		<b>UNDERPINNING KNOWLEDGE</b>	
<p>The person performing this task must be able to do the following:</p> <ol style="list-style-type: none"> <li>1. Complete the technical evaluation of computer vision projects;</li> <li>2. Consult services using modern engineering consulting methods;</li> <li>3. Complete the technical architecture and scheme design of computer vision projects;</li> <li>4. Prepare project proposals, feasibility study reports, and implementation plans;</li> <li>5. Observe health and safety precautions;</li> <li>6. Keep the workplace clean;</li> <li>7. Store the tools.</li> </ol>		<p><b>Detailed knowledge about:</b></p> <p><b>1.0 Methods</b></p> <p>The person performing this task must be able to explain how to:</p> <ol style="list-style-type: none"> <li>1.1 Evaluate computer vision project technology;</li> <li>1.2 Use modern engineering consulting methods;</li> <li>1.3 Complete the preparation of consulting documents for computer vision projects.</li> </ol> <p><b>2.0 Principles</b></p> <p>The person performing this task must be able to explain the following principles:</p> <ol style="list-style-type: none"> <li>2.1 Computer vision project technology;</li> <li>2.2 Technical architecture of computer vision projects;</li> <li>2.3 Scheme design of computer vision projects;</li> <li>2.4 Computer vision project implementation planning.</li> </ol> <p><b>3.0 Theories</b></p> <p>The person performing this task must be able to explain the following:</p> <ol style="list-style-type: none"> <li>3.1 Engineering consulting methods for computer vision projects;</li> <li>3.2 Feasibility study standards of computer vision projects;</li> <li>3.3 AI ethical requirements.</li> </ol>	

	<p><b>4.0 Essential Skills</b></p> <p>4.1 Communication, reporting and document writing skills;</p> <p>4.2 Problem analysis and solving skills;</p> <p>4.3 Solution development skills;</p> <p>4.4 Project leadership skills;</p> <p>4.5 Written and oral communication skills;</p> <p>4.6 Project consulting capabilities.</p>
<b>DESCRIPTION OF THE END PRODUCT / SERVICE</b>	Simple technical consulting services for computer vision projects are recommended to be implemented in accordance with industry standards and national information and communications technology governance guidelines.

**TABLE 1: DACUM CHARTS FOR ARTIFICIAL INTELLIGENCE ENGINEER - NTA 7**

DUTIES	TASKS	ENABLERS
1.0 Selection and simple application of basic algorithms of AI	1.1 Construction of an AI model development environment.	<p><b>General skills and knowledge</b></p> <ul style="list-style-type: none"> <li>• Development environment construction skills</li> <li>• Essential script language skills</li> <li>• Data analysis skills</li> <li>• Application model selection capabilities</li> <li>• Computer network skills</li> <li>• Python programming skills</li> <li>• Operating system command usage capabilities</li> <li>• Problem-solving skills</li> <li>• Interpersonal communication skills</li> </ul> <p><b>Tools and equipment</b></p> <ul style="list-style-type: none"> <li>• Computers</li> <li>• Remote access tools</li> <li>• Database management tools</li> <li>• Anti-static wristbands</li> </ul> <p><b>Materials</b></p> <ul style="list-style-type: none"> <li>• Software installation packages</li> <li>• Configuration documents</li> </ul> <p><b>Requirements for employees</b></p> <ul style="list-style-type: none"> <li>• Time management</li> <li>• Teamwork</li> </ul>
	1.2 Running AI basic neural network models.	
	1.3 Solving actual business using basic AI models.	
2.0 Implementation and application of basic deep learning algorithms	2.1 Analysis of deep learning framework models.	<p><b>General skills and knowledge</b></p> <ul style="list-style-type: none"> <li>• Essential skills of operating system</li> <li>• Computer network skills</li> <li>• Hardware skills</li> <li>• Essential script language skills</li> <li>• Knowledge of basic AI models</li> <li>• Desire to learn new technologies and master changing technology trends</li> <li>• Communication, report writing and analysis skills</li> <li>• Problem analysis and solving skills</li> <li>• Time management skills</li> <li>• Project management skills</li> </ul> <p><b>Tools and equipment</b></p>
	2.2 Installation, upgrade, and uninstallation of deep learning frameworks.	
	2.3 Training and use of deep learning framework models.	

DUTIES	TASKS	ENABLERS
		<ul style="list-style-type: none"> <li>• Computers</li> <li>• Remote access tools</li> <li>• Database management tools</li> <li>• Anti-static wristbands</li> </ul> <p><b>Materials</b></p> <ul style="list-style-type: none"> <li>• User profile</li> <li>• Software installation packages</li> </ul> <p><b>Requirements for employees</b></p> <ul style="list-style-type: none"> <li>• Time management</li> <li>• Teamwork</li> </ul>
3.0 Operation and use of AI platforms	3.1 Installation, upgrade, and uninstallation of AI platform server system software.	<p><b>General skills and knowledge</b></p> <ul style="list-style-type: none"> <li>• Essential skills of operating system</li> <li>• Computer network skills</li> <li>• Hardware skills</li> <li>• Essential script language skills</li> <li>• Knowledge of complex systems and how they work together</li> <li>• Desire to learn and master changing technology trends</li> <li>• Communication, report writing and analysis skills</li> <li>• Problem analysis and solving skills</li> <li>• Time management skills</li> <li>• Project management skills</li> </ul> <p><b>Tools and equipment</b></p> <ul style="list-style-type: none"> <li>• Computers</li> <li>• Remote access tools</li> <li>• Database management tools</li> <li>• Anti-static wristbands</li> </ul> <p><b>Materials</b></p> <ul style="list-style-type: none"> <li>• User profile</li> <li>• Software installation packages</li> </ul> <p><b>Requirements for employees</b></p> <ul style="list-style-type: none"> <li>• Time management</li> <li>• Teamwork</li> </ul>
	3.2 Configuration and use of AI platform server system software.	
4.0 Research and development of natural language and speech	4.1 Development of simple natural language and speech processing requirements analysis	<p><b>General skills and knowledge</b></p> <ul style="list-style-type: none"> <li>• Skills required to organize and translate into natural language and</li> </ul>

DUTIES	TASKS	ENABLERS
processing projects	reports.	speech processing
	4.2 Study and building of the basic natural language and speech processing technology architecture.	<ul style="list-style-type: none"> <li>• Natural language and speech processing technology architecture skills</li> <li>• Code writing skills</li> </ul>
	4.3 Completion of the code writing for certain aspects of natural language and speech processing projects (products).	<ul style="list-style-type: none"> <li>• Integration test skills</li> <li>• Problem-solving skills</li> <li>• Interpersonal communication skills</li> <li>• Moral skills</li> </ul>
	4.4 Completion of the integration test of natural language and speech processing projects (products).	<p><b>Tools and equipment</b></p> <ul style="list-style-type: none"> <li>• Computers</li> <li>• Remote access tools</li> <li>• Database management tools</li> <li>• Anti-static wristbands</li> </ul> <p><b>Materials</b></p> <ul style="list-style-type: none"> <li>• Data</li> <li>• Configuration documents</li> </ul> <p><b>Requirements for employees</b></p> <ul style="list-style-type: none"> <li>• Time management</li> <li>• Teamwork</li> <li>• Standardized writing</li> </ul>
5.0 Research and development of computer vision projects	5.1 Development of simple computer vision project requirements analysis reports.	<b>General skills and knowledge</b>
	5.2 Training, inference, and deployment of basic computer vision algorithms.	<ul style="list-style-type: none"> <li>• Computer vision requirements analysis skills</li> <li>• Basic computer vision algorithm training and deployment capabilities</li> <li>• Project process design capabilities</li> <li>• Code writing skills</li> <li>• Integration test skills</li> <li>• Problem-solving skills</li> <li>• Interpersonal communication skills</li> </ul>
	5.3 Engineering of common hardware environments and tool chains using computer vision algorithms.	<p><b>Tools and equipment</b></p> <ul style="list-style-type: none"> <li>• Computers</li> <li>• Remote access tools</li> <li>• Database management tools</li> <li>• Anti-static wristbands</li> </ul>
	5.4 Code writing for certain aspects of computer vision projects (products).	<p><b>Materials</b></p> <ul style="list-style-type: none"> <li>• Data</li> <li>• Configuration documents</li> </ul>
	5.5 Integration test of computer vision projects (products).
